DETAILED ACTION

1. This office action is a response to the restriction requirement filed on 11/26/2003.

Response to the Restriction Requirement

2. Applicant's election without traverse of Group I, claims 1-25, in Paper No. 7 is acknowledged.
3. Claims 26 and 27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.
4. Upon further consideration, Group I, claims 1-25, contains claims directed to the following patentably distinct species of the claimed invention:

Species A, drawn to claims 8 and 19.

Species B, drawn to claim 9.

Species C, drawn to claim 10.

Species D, drawn to claim 11.

Species E, drawn to claim 12.

Species F, drawn to claims 13 and 22.

Species G, drawn to claim 16.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic claim.

Species A is for one of the first and second components comprises a flexure and the other of the first and second components comprises a load beam.

Art Unit: 3729

Species B is for one of the first and second components comprises a spring region and the other of the first and second components comprises a load beam.

Species C is for one of the first and second components comprises a spring region and the other of the first and second components comprises a mounting region.

Species D is for one of the first and second components comprises a spring region and the other of the first and second components comprises a flexure.

Species E is for one of the first and second components comprises a stiffener and the other of the first and second components comprises a flexure.

Species F is for one of the first and second components comprises a stiffener and the other of the first and second components comprises a load beam.

Species G is for one of the first and second components comprises an integrated lead flexure and the other of the first and second components comprises a load beam.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3729

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul D Kim whose telephone number is 703-308-8356. The examiner can normally be reached on Tuesday-Friday between 8:00 AM to 5:30 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 703-308-1789.
